

VDC Teacher Application

Project Configuration V2 - Four Teachers, Seven Classes

Purpose: production-ready configuration for the VDC Teacher mobile app using Supabase, administrator-provisioned teacher accounts, and class access controlled by Row Level Security.

Authentication Model

Rule	Configuration
Teacher account creation	Administrator creates teacher accounts manually in Supabase Auth.
Teacher registration	No registration, sign-up, or self-service account creation in Version 1.
Login behavior	Teachers log in with credentials shared by the administrator.
Authorization	Teachers only see assigned classes, students, attendance, tests, assignments, reports, and notes.
Security enforcement	Access must be enforced in Supabase RLS, not only by frontend filtering.

Class Configuration

Student Import Policy

Field	Use in App
student_reference_number	Internal VDC app reference generated for each student; college registration IDs are not required.
class_code	Connects each student to one of the seven app classes.
roll_number	Used for roster ordering and attendance display.
full_name	Shown in class rosters and reports.
gender	Optional profile field copied where present.
guardian_phone_e164	Used later for SMS. Missing father numbers stay blank.
guardian_sms_opt_in	Defaults to FALSE until SMS consent/template/provider process is ready.

Excluded Admission Data

The app import must exclude Aadhaar numbers, caste/sub-caste, marks, fee/receipt details, address, PU college, birth date, email, and other admission-only information unless a future approved feature explicitly requires it.

Supabase Notes

Area	Decision
RLS	Every teacher-facing table must remain protected by RLS.
Class access	Use teacher_classes / subject assignments from this configuration as seed data.
Guardian phone privacy	Prefer a separate guardian/contact table before import so parent phone data is not mixed into the basic student table.
SMS	Do not auto-send SMS until provider, consent, sender ID/header, and approved templates are ready.
